DAVID BROOKE RUSH BUILDERS

Dear Brooke :

I want to Thank you For a job very well done from start to finish in the rebuilding of our roof and top floor to solve a chronic leak problem.

After years of repainting walls and ceilings because of rain water leaking in, I appreciated your careful analysis and diagnosis of the problem, determining a structural defect in the original construction of the roof, and devising a plan to correct it at the lowest cost possible.

Since the work required your employees to be in our house for an extended period we appreciated the respect they showed for the rest of the house and for our privacy while they were here. Keith and Feryl are excellent representatives for DBR Builders

with their careful and conscientious work and attention to leaving the "job site" (our home) clean at the end of each day.

You and your employees were always attentive and responsive to our requests regarding scheduling and changes in plans. You performed the work according to schedule and finished on time (a tribute to your planning over three months, considering delivery of materials, weather constraints, and bringing it all together.)

After the construction, painter Don Rush was, as always, thorough and efficient in finishing the job artistically.

In the end, it has been two months and many rainfalls since DBR finished and I am happy to say that your analysis, diagnosis and "cure" have made our house a greater pleasure to live in.

Sincerely,
Philp Moldofsky, M.D.
