

Evaluation

We had our kitchen re-done, and Brooke did so much to make it as painless as it could be. He worked with us to come up with ideas to improve our kitchen, but also made us be realistic as to what would work. He paid attention to details up front, before the job was started, and saved us time and money in the long run. He partitioned the kitchen off from the rest of our home to keep the dirt out and keep the rest of our home private for us, which made the weeks of no kitchen less painful.

Brooke and all his employees and subcontractors were wonderful. Any questions we had were always answered the same day, either by e-mail or telephone. For me, it was especially nice to be able to go on-line late at night and send or receive an e-mail, since at the time, I was working full-time and going to school.

Brooke gave us a very specific schedule as to when things would be completed, but was flexible to change things when I was unable to make decisions due to time restraints. The job was completed two weeks ahead of schedule, which was great!

The kitchen looks great. Brooke followed up on every little issue we had, which were very minimal things and corrected them. I would recommend him for any job, large or small.

Sincerely,

Eileen K. Souder
